2000B Power Pre-Stretch Wrapper Stainless Steel

The 2000B Power pre-stretch pallet wrapping machine, stainless steel option. Ideal for the Food and beverage industries and best suited for environments that require constant cleaning with detergents and a presence of moisture or water, no more rust! The power pre-stretch functionality of the 2000B range wrappers can improve stretch film yield, up to 80%. We recommend using a minimum of 20-micron Afcom stretch film to ensure the best possible results.

Features & Benefits

- Semi-auto stretch wrapper with a power pre-stretch film system
- Auto pallet height sensor – standard
- Programmable wrap cycles & touch pad control system
- Nylon links & bearings for reduced noise emissions
- Minimal servicing required & spares/technical support assured from any Bidvest Afcom branch workshop
- Delivery, commissioning & staff training handover generally included
- Pallet jack ramp included
- Ideal for cold rooms in the meat & dairy industries
