

Vapor Vac™ Container Liners

Durable Liners

Made of high-grade
PE film under ISO
certified conditions

Fire Prevention

Controlled
atmosphere reduces
risk of fire incident

Climate Control

Prevents package
from temperature
fluctuations

Oxidation Prevention

Protects package integrity
by lowering possibility of
chemical reactions

Vapor Vac Container Liners

The unique features of our Vapor Vac Liner paving the safer way for bulk transport of charcoal are :

- **High Puncture Resistance** – Built with high quality material, reducing risk of punctures during loading.
- **Floor Re-enforcement** - Allows for easy loading of the charcoal shipments, even with forklift.
- **Sealing mechanism** – Vapor Vac liner comes with Resealable technology.
- **Airtight Sealing** - Forms a barrier against oxygen, moisture, and air.
- **Patented Valve** - Provides for leak proofing and quick and effective vacuuming.
- **Quick installation** - Designed for faster turnaround of the loading operations.
