KEEPING IT ALL TOGETHER

BMS-1500 Border System

This versatile mattress border system enables you to easily adapt to changing market trends. A single sewing head and base machine is designed to accept affordable interchangeable components to add decorative border ribbon materials, border zippers, join varying materials or create Cinch-loc® ruffled mattress gussets.

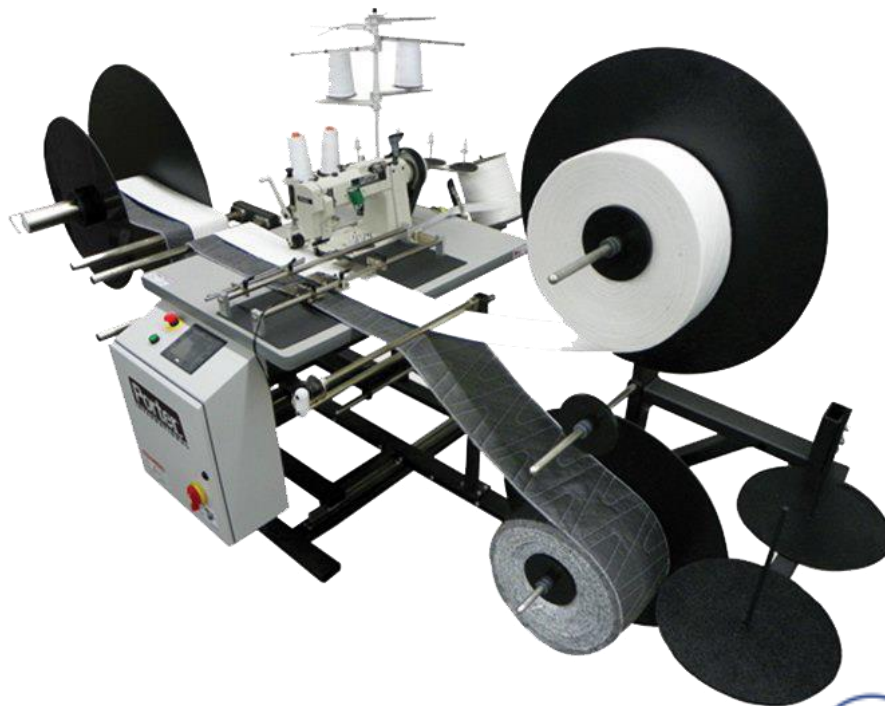

Start with any of the following machines and add associated modular components as needed:

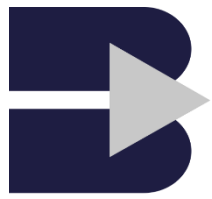

- PRM-1500 Automatic Ribbon Machine
- PJM-1500 Border Material Joiner
- PZM-1500 Automatic Zipper Machine
- PCL-1500 Cinch-loc Pillow top Gusset machine

Addition interchangeable components can produce the following border features:

- Faux pillow top production
- handle straps
- insert 3-D mesh
- add welt cord trim

The BMS-1500 system is designed to allow you to start with a machine that constructs the border styles you currently need, and as needs change, you can bolt on different fixtures to produce new styles. This can save you money since you won't have to invest in an entirely new machine with every new change, and operator training is minimal as all the automated processes are based on the same core machine

Technical Specifications

Model	BMS-1500 Modular System
Stitch type	Chainstitch (needle configuration depends on application)
Max sewing speed	2200 rpm
Recommended sewing speed	2000 rpm
Presser foot height	7.94mm
Needle type	62 x 57
Needle size	23
Needle Height	7.94mm
Voltage/Phase	220/1 (Alternative voltage available)
Current	5 amps
Air pressure	5.5 bar
Air consumption	2 cfn
Max thickness	12.7mm
Shipping dimensions (L x W x H)	3150mm x 1450mm x 1900mm

No guarantees are provided against the above specifications as the use, condition and applications are outside the control of this company.
