

The BXT3 16/19 combination strapping tool applies polypropylene or polyester strapping, utilizing friction weld joint technology to join the strap ends. An automatic weld function speeds up cycle time. Suitable for 9-19mm strap. Operation Mode can be changed in between auto/semi-auto or manual. Cycles from Battery charge from 800-300 depending on tension. The battery charge time: 15-35 minutes.

## Features & Benefits

- Real Time indication of applied force
- Variable Tension Speed
- Strap alignment indication
- Strap dust blow out vent
- Battery protection

Technical Specifications	
Model	BXT 3 16/19
Compatible Strap Type	PET & PP
Compatible Strap Width	16mm – 19mm
Compatible Strap Thickness	0.8 – 1.3mm
Weight	4.3 Kg
Tension Force	400 – 4500 N
Variable Tension Speed	0 – 120 mm/s
Cycles/charge	Up to 800
Battery	Bosch Li-ion, 18V, 4.0Ah
Charging Time	25 – 35min
Motor Technology	Single motor brushless technology
Dimensions	370 x 143 x 135mm

No guarantees are provided against the above specifications as the use, condition and applications are outside the control of this company.
