

The H-26 is a heavy duty ratchet tensioner and is made of alloy steel. It is used with composite strap, [PET strap](#) and [poly-woven strap](#) for heavier strapping applications which ensure that the correct amount of tension is applied to secure the load safely. The H-26 is larger than the [H-21 ratchet tensioner](#) which is used for light to medium strap applications.

### Features & Benefits

- Machining made of alloy steel
- Heavy duty range
- Strap width: 25 mm-40 mm

TECHNICAL DATA	
Model	H26 Tensioner
Operation	Mechanical / Manual
Functionality	Tensions & cuts strap
Materials	Alloy Steel
Strap Compatibility	Polypropylene Strapping, PET Strap, Polyester Woven Strap, Composite Strap
Strap Size	25mm – 40mm
