

The H-42 combination tool is used to tension, seal with a UP12/UP16 seal and cut [polypropylene strapping](#). With the cogwheel to drive the windlass tensioner guarantees high tension on either a 12mm or a 16mm polypropylene strap.

Features & Benefits

- Tensions, cuts and seals all in one
- Light weight
- Affordable & easy to maintain
- Heavy duty polypropylene combination tool
- For continuous use, 12mm or 16mm
- Ratchet mechanism and gripper foot
- For strapping small cartons, packages & pallet tops
- For use with semi-open seals for pp strapping
