

The Josef Kihlberg Sisal plier is a Swedish-manufactured professional tool that is lightweight, well-balanced and with a low vibration value. It has a pneumatic drive system enabling quick and efficient stapling. The sisal plier is intended for industrial stapling, e.g. in bed manufacturing such as polyether.

## Features & Benefits

- Requires no special servicing. It only needs regular cleaning with a non-aggressive (noncorrosive) cleaner agent. Do not remove any parts for cleaning purposes!
- Smooth trigger to ensure comfort for long term use.
- The light weight, balance and low vibration value of the tool makes it comfortable for continuous use.

TECHNICAL DATA	
Model	JK20V779L
Dimensions (L x W x H)	370mm x 68mm x 305mm
Magazine Capacity	168 Fasteners
Max Air Pressure	7 bar (102 psi)
Leg Length	370mm
Nose Length	14mm
Weight	2.2 kg
Throat Depth	35mm
Staple Leg Length	12mm – 16mm
Lubrication Required	Yes
