

The Q31 PET/PP battery powered combination strapping tool is designed for medium duty strapping applications and comes with the capability to set the tension force to achieve the required tension. It can then be locked to ensure a consistent strap tension through the shift. The Q31 is ideal for a wide range of applications in all industries and sectors. It is equipped with various features such as a soft and hard mode, auto-lock functionality and a sleep state when not being used.

Features & Benefits

- The Q31 has 3 different mode selections, Manual, Semi-Automatic and Fully Automatic
- Soft & Hard Tension modes
- Auto lock Operation Panel if no operation status has lasted longer than 30 seconds.
- It has the functionality to adjust tension force as well as welding time to ensure the best tension and weld possible.
- The tool will enter sleep state if no operation status has lasted for 120 seconds

TECHNICAL DATA	
Model	Q31
Power	18V, 5.0 A/h
Compatible Strap Width	13mm – 16mm
Compatible Strap Thickness	0.5mm – 1.2mm
Tension Force	400N – 4200N
Tool Dimensions (L x W x H)	335mm x 145mm x 145mm
Tool Weight (with battery)	4.05kg
Battery Working Duration	Up to 700 strap beats
Battery Charging Time	± 90 minutes
