

The Sofragraf Netlock Bagging Machine is used extensively in the fresh produce market for the bagging of fruits and vegetables. It is also commonly used within the promotional sector or industries where bagging light plastic goods is done. The single hopper Sofragraf Netlock bagging machine is only available with a foot operated pedal whereas the double hopper can be used with a foot operated pedal as well as air pressure for high volume throughput. The machine uses a FT8 staple.

Features & Benefits

- Cuts and staples tags with the netting
- Various net colours available
- Optional 2nd hopper
- Optional pneumatic instead of manual foot operation
