

The TEC 3400 industrial hot melt applicator uses 1 x 43mm glue slugs and is all electric which means you do not need an air compressor to run it. It's a Smart Gun. The TEC 3400 knows when you are dispensing faster and more often and boosts power to the heater to catch up with the increased demand. It's an Eco Friendly Gun. During periods of non-use, the TEC 3400 automatically reduces the temperature until finally the gun is switched off after 2 hours. Pulling the trigger will restart the gun and it will quickly regain temperature for use. It Can Diagnose Problems. This is one of the most dependable industrial glue guns on the market. If there ever is an issue, the TEC 3400 can now detect errors and notify the user using a flashing indicator light to insure safety to the user and any additional damage that may be caused to the gun.

Features & Benefits

- Digital Temperature Microcontroller.
- Smart Gun, heater temperature increases as output increases.
- Eco Friendly, reduces temperature when not being used and eventually switches off after 2 hours.
- Can detect errors and indicate with a flashing indicator light to insure safety.

TECHNICAL DATA	
Model	TEC 3400
Power	120v and 230V
Wattage	400W
Melt Rate	3.8 kg/hr
Glue Size	43mm Glue Slug
Weight	1.15kg
Power Cable	3m
